Milestone 3 Horizontal Prototype CSC 648-848 Fall 2021 Sec 02

Team 1

ITEM:	CREDENTIALS
Website Url	18.190.48.206:3000/
Website Url to search page	http://18.190.48.206:3000/rooms http://18.190.48.206:3000/roommates
SSH URL	18.190.48.206
SSL Username	Ubuntu
SSH Password/Key	rumi-20210906.pem
Database URL	127.0.0.1:3306
Database name	rumi-db2
Database Username	rumi
Database Password	password
Link to GitHub page that performs the Search	https://github.com/CSC-648-SFSU/csc648-fa21-02-team01/blob/master/application/rumi/backend/routes/posts.js

Tasks we need to implement next:

Comments - will be positioned on posts to show interest in rooms

User Profile Dashboard - centralized place to show the user their profile and their posts

Messaging system - Private User to User system to discuss about rooms/roommates

List of tasks the team chose to focus on and improve:

Mapping - we have a foundation for maps. We plan to include a map in our create room page and our room listing page to show users where rooms are located

Cookies - this is our biggest bug. We were able to fix it with a fetch function but cookies don't work on aws. We will be investigating this issue on aws in terms of configuring our website platform

Search error handling - our app crashes when a search is not found. We plan to fix this issue by telling the user that no posts meet search Criteria.

List of P1 functions agreed during the meeting
